24 February 2015

Dear Parents/Caregivers

St Joseph’s is committed to continuous improvement in all areas of teaching and learning at our school. Our School Improvement Plan has targeted Numeracy (and Mathematics) as a focus area in 2015. In order to support our commitment to improve student achievement in this learning area, we are gathering data from all key stakeholders – teachers, students and parents - to assist with planning and implementation of our strategic goals.

As partners in the education of your child, your input is highly valued. It would therefore be very much appreciated if you could complete this short survey and return it to your class teacher on or before Friday 6th March. Responses to this survey will remain anonymous and data gathered will be used in accordance with the School’s Privacy Policy.

Yours sincerely

Phil Stubbs
Principal

PARENT SURVEY Perceptions of Numeracy 2015

What do you think Maths education is about these days?

How do you think you can best help your child's learning in Mathematics?

How would you rate your own experience of learning Mathematics at school? (Please indicate on scale)

Poor | | | | Excellent
